# DARK SHADOW

## 135 YEARS LIMITED EDITION

We are celebrating 135 years of STABILA with a very special offer: our popular spirit levels are now available as a limited anniversary edition in an exceptional design. Take your work to the next level with the three Dark Shadow special models.

**TRADE-A-BLADE**  
THE ORIGINAL EXCHANGE SYSTEM™

Trade-A-Blade offers professional grade products for the contractors who want to save money. The Trade-A-Blade™ “Trade Credit” system is simple. It rewards users by giving them a “Trade Credit” (\$2, \$4, \$8 or \$12) toward the purchase of any new Trade-A-Blade™ product. This is an easy and a cost effective way to save you money!

# TRADE AND SAVE!

At Trade-A-Blade, we're dedicated to more than just delivering top-quality products; we're equally committed to making a positive impact on both the environment and those in need. Our trade program not only ensures that we minimize waste and reduce our carbon footprint but also channels the proceeds from recycled materials towards charitable initiatives that support the less fortunate. By choosing our products, you're contributing to a greener planet and helping fund programs that provide essential resources and support to those in need. Together, we're building a more sustainable future and making a meaningful difference in our communities. Thank you for being a part of this vital effort.

The TRADE AND SAVE process is simple: Buy any Trade-A-Blade™ high performance Power Tool Accessory. Once worn and dull simply Trade it in at your local dealer and receive a “Trade Credit” towards your next Trade-A-Blade™ purchase. All Trade-A-Blade™ products are NEW - NO remanufacturing. Competitor trades are also accepted on like for like product.

## Update on Table Saw Regulations

Experts estimate that there are 65,000 table saw injuries per year

Waves are being made on Capitol Hill as the Consumer Product Safety Commission moves to propose a new rule requiring all table saws to have active injury mitigation technology (AIM). There is currently one company on the market that has this feature, SawStop.

SawStop, using AIM, helps prevent devastating injuries by using a small electrical signal within the blade to detect human skin. Since human skin is conductive, once the blade senses the change in signal, an aluminum brake forces the blade to come to a stop. From then, the blade uses its own momentum to drive itself beneath the table, all within 5 milliseconds of contact.

Proponents of the rule say that a mandated blade brake on all table saws is long overdue, stating it is one of the most dangerous tools a consumer can purchase. Experts estimate that there are 65,000 table saw injuries per year and OSHA estimates the cost of an amputation is \$130,000 for a business.

Those against the bill say that the proposed regulations will increase the cost of table saws and could cause a monopoly. The Power Tools Institute, representing large tool manufacturers such as Makita, Milwaukee, Skil, and Bosch, has held fast in their opposition against the ruling. They hypothesize that the ruling would cause not only an increase in the price of table saws, but will cause companies to stop manufacturing table saws and put smaller companies out of business. (PTI, <https://www.powertoolinstitute.com/pti-pages/it-table-saw-facts.asp>).

Dr. Steve Gass, created the patented technology in 1999 and subsequently founded SawStop in 2000 with the help of three friends. The patent has been cited as major roadblock in the road to implementing this new regulation. Since the proposed rule, CEO, Matt Howard, has stated that if the CPSC rule takes effect, SawStop

would dedicate their patent to the public, challenging competitors to “get in the game”.

The statement from Howard regarding Patent 840 (also known as the SawStop patent) comes as a shock to many after years of aggressive litigation. Manufacturers have attempted to produce table saws with injury prevention features in the past, but were met with fierce opposition from SawStop.

Richard Trumka, CPSC commissioner says, “In the name of consumer safety, SawStop has just made an incredible gift to the public. I personally wish to commend Tooltechnic Systems (TTS), SawStop’s owner, for ensuring that no patents will prevent active injury mitigation (AIM) technologies on saw blades once a CPSC rule takes effect.” (CPSC, CORT-Statement-on-Table-Saws-Hearing.pdf)

# Solid edge glued Fascia

**FINISHING:**  
EDGE GLUED  
S1S2E KD

**GRADE:**  
SELECT KNOTTY

While most wood products are environmentally friendly due to their role in carbon sequestration and biodegradability, engineered products boast the additional advantage of having a plentiful supply, gluing together narrow knotty material, utilizing a renewable resource wood fibre sourced from smaller logs.

At PWW we manufacture a number of high-quality engineered WRC products and are pleased to have added the fully-automated Doucet RT100- the fastest and most technologically advanced robotic operator for clamp carriers- to our facility. The RT100 has advanced design features for precision assembly and flawless task execution.

**All the beauty of select knotty Western Red Cedar, but with the added strength and stability of a high-quality gluing, our engineered products are incredibly durable and are manufactured to the highest standards anywhere.**

All Fascia products are kiln-dried, available in long lengths for seamless applications and are edge-glued.

- Solid full length edge glue with no finger joints
- Western Red Cedar
- Kiln Dried
- Resawn face with a planed eased edge back
- Edge glued to help prevent cupping

**We Stock 2x12  
in 16' and 20' lengths.  
12' length by special order.**

**Also available by special order:  
1x12 in 12', 16' or 20' lengths.**

## BACKED BY STRONG WARRANTIES

LP has your back with an industry-leading transferable prorated limited warranty for LP SmartSide products. Finish the pre-primed siding at your jobsite and get a 5 year 100% labor and material replacement warranty with a 50 year prorated limited warranty from LP.

### Engineered Wood vs. Composite

Traditionally, composite siding is made up of fibrous wood pieces as a base that is bonded with additional materials. However, there are also composite siding options that do not use wood as the base (for example, using cement instead).

### SmartSide Siding

Technically, engineered wood siding is a subset of composite siding. It's typically made of wood that includes minimal extractives or tannins that could stain and bleed through, which helps improve appearance. During the manufacturing process, the product is cut and sliced into strands.

### Engineered Wood vs. Fiber Cement

While both engineered wood and fiber cement offer impressive durability and aesthetic appeal, LP® SmartSide® engineered wood siding comes with an industry-leading limited warranty and is much easier—and faster—to install. Engineered wood also offers better impact resistance.

### Engineered Wood vs. Traditional Wood

Though it's hard to argue with the beautiful appearance of traditional wood, it is also a material that comes with all of Mother Nature's inherent flaws. LP® SmartSide® Trim & Siding, on the other hand, offers similar aesthetics with much better durability as well as impact and moisture resistance.

### Engineered Wood vs. Vinyl

While vinyl has earned its position as the most popular siding material on the market with its affordability and easy maintenance, it cannot match LP® SmartSide® Trim & Siding's durability, impact resistance and attractive appearance.

*As the most durable siding on the market, engineered wood combines the aesthetics of real wood with engineered strand technology for superior durability.*

*Withstanding the passage of time, it's a great choice for versatile applications.*

## FOUR COMPONENTS OF PROTECTION

The secret to LP SmartSide Trim & Siding's reputation as the most durable wood siding is LP's proprietary SmartGuard® manufacturing process. It ensures that every strand of wood is treated with a carefully formulated mix of resins, waxes, and zinc borate and finished with an overlay to offer complete protection against hail, moisture, termites and fungal decay.

### Zinc Borate

This naturally derived additive helps engineered wood resist damage from termites and fungal decay.

### Resins

Engineered wood stands up to impact and survives freeze/thaw cycles due to resins that offer incredible strength.

### Waxes

Designed to resist moisture, waxes coat each strand to offer enhanced durability in humid environments.

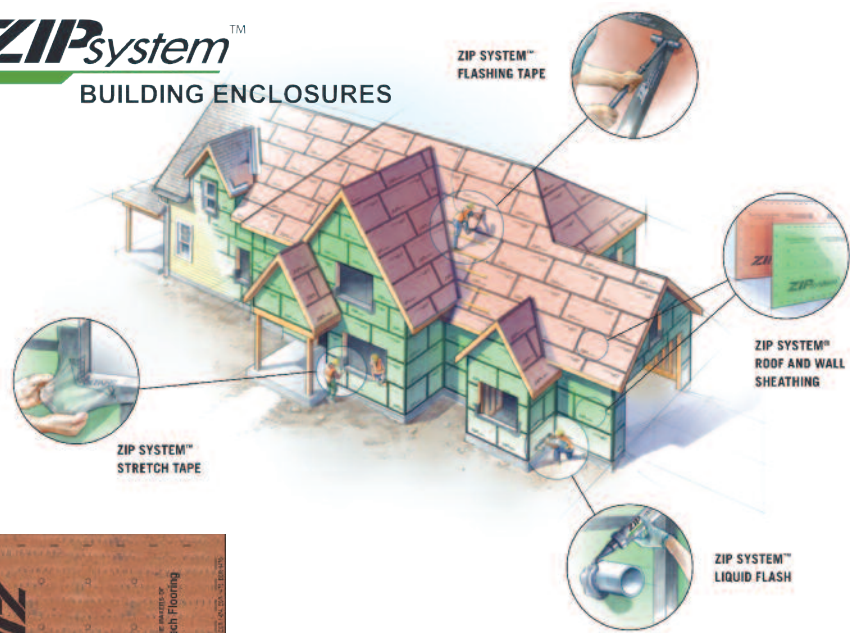

### Overlay

This final element of protection resists moisture intrusion, providing a durable base for a finished look.

**ZIPsystem™**  
BUILDING ENCLOSURES

#1532ZIP 4x8 **\$37<sup>97</sup>**  
#1012ZIP 4x10 **\$50<sup>93</sup>**

**Zip System Roof & Wall Sheathing 15/32"**

ZIP System® roof sheathing and tape provides an excellent roof underlayment to receive many finished roof coverings including metal, tile and asphalt shingles, fiberglass shingles or cedar shingles. ZIP System® wall sheathing and tape provides an excellent substrate for wall claddings including brick, siding, stucco or cedar shingles. Whether using for roof or wall Zip panels install flat and stay flat, ensuring a finished that looks as good as it performs.

**STREAMLINE WALL WEATHERIZATION WITH ZIP SYSTEM® SHEATHING AND TAPE**

**SPEED AND EASE OF INSTALLATION**  
Zip System® sheathing and tape is easier to install than traditional housewrap and felt, helping save money on labor costs and improve project cycle times.

**BUILT-IN WATER-RESISTIVE BARRIER**  
By achieving optimal levels of permeability and drainage, ZIP System® sheathing and tape protects against water intrusion, while still allowing the panels to properly dry.

**CONTINUOUS BARRIER**  
Zip System® sheathing and tape forms a tight barrier against unwanted air leakage, for a durable building envelope that helps promote energy efficiency and increase interior comfort.

**STRUCTURAL DURABILITY**  
ZIP System® panels are available with a Structural 1 rating,<sup>3</sup> so you can get the ultimate shear strength to meet seismic and high-wind zone requirements.

**PEACE OF MIND**  
ZIP System® product line is backed with a 30-year Limited Warranty<sup>2</sup>.

1. BUILDER magazine's 2015-2018 Brand Use Studies; Wall Sheathing category.  
2. Limitations and restrictions apply. Visit HuberWood.com/warranties to learn more.  
3. Structural 1-rated panels only available from certain mills. Contact Huber for mill-by-mill availability.

**\$46<sup>99</sup>**

**ZIP System Flashing Tape**  
#5017100. 3.75" x 90'. Ideal for both seam sealing and flashing. Advanced acrylic adhesive delivers superior bonding and resists heat and UV light. Compatible with a wide range of materials and substrates, including PVC windows. Withstands up to 180 days of direct UV exposure.

**\$59<sup>99</sup>** Zip System Tape Roller

#5017131. ZIP System sheathing and tape is designed to give you a visual indicator where tape has been rolled. The split-neck roller design allows for easy rolling access in tough to reach spots such as doors, inside corners and round windows.

#5017118 6"x20' **\$88<sup>99</sup>**

#5017123 6"x75' **\$220<sup>99</sup>**

**ZIP System Stretchable Flashing Tape**  
Easily stretches to fit sills, curves and corners with a single piece without having to piece tape segments together. Made of a high performance composite acrylic, the tape conforms to challenging applications and locks out moisture even over mismatched surfaces.

**\$73<sup>99</sup>** ZIP Liquid Flash

#5017155. 29 oz. ZIP System™ liquid flash is a fluid-applied membrane that easily flows into recessed windows and around penetrations and other hard to-flash areas, in addition to sealing transitions from wall sheathing to foundations. Plus, the moisture-curing formula helps complete exteriors in the toughest conditions.

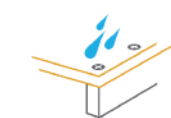

**ENGINEERED TO BRING PERFORMANCE, QUALITY AND CONFIDENCE INTO EVERY FLOOR.**

Engineered with strength, moisture resistance and nail-holding power, AdvanTech® subflooring is the brand builders trust for quality subfloors. Combined with the polyurethane bond of AdvanTech™ subfloor adhesive, the AdvanTech™ Subfloor Assembly offers a panel-to-joist connection so powerful you won't hear a squeak, guaranteed.<sup>1</sup>

Build with award-winning AdvanTech subflooring and rest assured you'll get the most from your subfloors and everything you build on top of them for the FLAT OUT BEST™ in quiet, stiff floors.

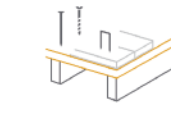

#34ADVTG 4x8x23/32" AdvanTech T&G Subfloor ST#1 **\$56<sup>53</sup>**

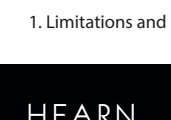

**1 MOISTURE PROTECTION THROUGHOUT THE ENTIRE PANEL**  
Every wood strand is coated with advanced moisture-resistant resins that provide moisture resistance even along freshly cut edges.

**2 SELF-SPACING TONGUE AND GROOVE PROFILE**  
The precisely engineered and durable profile helps ensure every panel fits together easily.

**3 LIES FLAT AND INSTALLS EASILY**  
Advanced quality controls and innovative manufacturing process help ensure every panel goes down with ease.

**4 HIGH WOOD DENSITY**  
More wood is packed into each panel of AdvanTech® engineered subflooring. This produces an ultra-dense, ultra-strong panel that securely grips fasteners.

# Mead Clark Lumber Employees of the Year 2023

*Dedication to both the company & our customers*

This year at Mead Clark Lumber Company, we were tasked with the difficult decision of awarding an employee with the honor of Inside Employee of the Year and an employee for Yard Employee of the Year. When working with such a large team of committed and steadfast individuals, it can be hard to pick just one to acknowledge.

That's why we didn't choose just one, we have chosen to recognize both Juan Hernandez (Outside Sales/Purchasing) and Matt Marris (Outside Sales) for Mead Clark's 2023 Inside Employee(s) of the Year. Mead Clark's 2023 Outside Employee of the Year has been awarded to Yard Man Kevin McCool for his outstanding diligence and hard work.

Matt started working at Mead Clark when he was just 24 years old in October of 1999. Before that, he worked with our very own Soa Vang as a yardman at another local lumber company. He started at Mead Clark in our receiving department and moved throughout the company where he is now an outside salesperson servicing Sonoma, Napa, and beyond.

Matt says his favorite thing about working at Mead Clark is "the overall way that employees are treated. It feels as though we are more of a family. There is just really amazing synergy within the company".

Juan Hernandez began working at Mead Clark in 2016. He also started as a member of our receiving department and has since found himself handling both commodity purchasing and outside sales. That is part of what he enjoys most about Mead Clark, "No two days are the same. Each day brings on a different challenge".

*Juan Hernandez and Matt Marris for Mead Clark's  
2023 Inside Employees of the Year*

Juan says he values being able to participate in our Customer Appreciation BBQ's, as he recalls coming to Mead Clark's Tech Fairs when he was a youngster with his father.

*Kevin McCool Mead Clark's 2023  
Outside Employee of the Year*

Kevin started his career at Mead Clark in 2021. As a yard man, his days are spent wearing many different hats, whether it's assisting in our receiving yard, making cuts at the saws, or helping our customers load the proper material. Prior to working at Mead Clark, he worked as a truck driver for both DOSS Logistics and Good Will.

Kevin has been in construction since he was 10 years old as his father was a general contractor, "I learned everything from him", he says. He also gained a passion for comic books from his father as well, his father owned a SpiderMan #1 comic book, along with a vast collection of many other originals.

Kevin enjoys keeping his fellow employees on their toes by showing up to yard inventories dressed as something different each time. In the past, this has consisted of a Scotsman (kilt included) and a pirate (his 3ft rapier not included).

Kevin, Juan, and Matt have shown continuous dedication to both the company and our customers. You have seen them on job sites, you have seen them hustling around the store and the yard. Their drive to serve you, our contractors, has not gone unnoticed. We thank them for their efforts not only within the past year, but also throughout their years at Mead Clark.

## Mead Clark Takes All

*Ukiah Rifle & Pistol Club Trap Shoot*

In an industry sponsored trap shoot at the Ukiah Rifle & Pistol Club, Mead Clark Lumber took home the honor of the 1st place team. The all-star team (pictured above, left to right) consisted of Darrell Welsh of DW Construction, Juan Hernandez of

Mead Clark, Jon Ray of Jon Ray & Sons Construction, Nick Acheson of Sheehan Construction, and Matt Marris of Mead Clark.

There were 80 total shooters in attendance, roughly sixteen of whom were employees and

*L to R. Caprice Allen of BMD and Kendall Simpson of Mead Clark. Caprice won the top award for the entire shoot, the "Dead Ass Last" trophy for the worst score. The award comes with free entry to the next shoot.*

contractors who shop at Mead Clark. The lively shoot was followed by a BBQ lunch catered by The Blue Bird Café and a gun raffle. A good time was had by all, thank you to the Ukiah Rifle & Pistol Club for hosting us!
