Big Stretch®

Won't Crack ... It Just Stretches

Spend more time doing what you want, not on call backs fixing catastrophes like this.

Dripless Delivery

...avoid having to clean up extra sealant that drips out of the tube.

Plastic Packaging

...ensuring a longer shelf life and that cartridges won't get soggy in the truck.

Freeze-Thaw Stable Formula

...so you don't have to worry about product in the truck.

10.5 oz Fill

...goes further than competitive brands.

The Problem: Cracking.

Houses move. This happens with settling, temperature changes, wind, etc.

- ✓ **THE SOLUTION:** You need an elastic sealant that can move with the house.
- ✓ **THE ADVANTAGE:** Big Stretch relaxes when stretched. A sealant that is relaxed will be more durable and avoid cracking.

The Problem: Adhesion.

Caulks can fail if they do not have good adhesion.

- ✓ **THE SOLUTION:** You need a sealant that is all-purpose, not one for metal, another for wood, another for mortar, and another for PVC.
- ✓ **THE ADVANTAGE:** Big Stretch has great adhesion to all of those surfaces, and more.

The Problem: Application.

Caulks are not easy to apply.

- ✓ **THE SOLUTION:** You need a product that is easy to gun without running out of the joint.
- ✓ **THE ADVANTAGE:** Big Stretch is formulated to gun out easily at cold temperatures and hang well in hot temperatures. It is easy clean-up as well.

10.5 oz. Big Stretch White or Clear
#6234652/6234637

\$7⁹⁹ ea

LEXEL®

The Tough Elastic Sealant for Every Job

Spend more time on new projects, not on callbacks fixing catastrophes like this.

The Problem: Adhesion.

Caulks can fail if they do not have good adhesion.

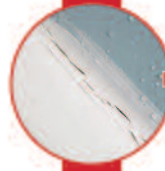

- ✓ **The Advantage:** Lexel sticks to difficult surfaces, even when wet.

The Problem: Clarity.

Sealant beads that look unsightly.

- ✓ **The Advantage:** Lexel is 19 times clearer than silicone and is consistently clearer than other 'clears' on the market.

The Problem: Durability.

Most caulks crack or yellow when given time.

- ✓ **The Advantage:** Lexel is relaxed when stretched, so it resists tearing. It is also UV resistant.

10.5 oz. Lexel Caulk Clear
#8188195

\$9²⁹ ea

Screw-On Nozzle

... Easily puncture foil seal or use with your favorite nozzle.

Dripless Delivery

... Less on your jeans, more in the joint.

High-Performance Packaging

... Extends shelf life.

10.5 oz Fill

... 5-15% more product in each cartridge.

GOOD

Residential and light commercial weatherproofing: The industry's most complete system and warranty.

The Henry® 1-2-3 Moisture Control System™ Warranty

When you use the Henry 1-2-3 Moisture Control System you get products proven to be among the best on the market.

With this system, you get the added protection of the Henry 1-2-3 Moisture Control System Warranty, offering 15 years of coverage backed by a company that's been in business for over 80 years.

This system is expressly warranted for a period of fifteen (15) years from purchase that it will perform to Henry Company LLC (and its subsidiaries and affiliates hereinafter collectively "Henry") published specifications when installed according to Henry installation procedures and accepted industry standards or following installation details prepared by a properly licensed design professional. In the event of a warranty claim, Henry will pay the cost of materials and labor to correct leaks that result solely from the failure of Henry product as expressly warranted above.

FortiFlash

FortiFlash® is a cost-effective self-adhering flashing membrane that provides protection against moisture intrusion. It can be used around windows, doors, and non-roofing horizontal applications such as pot shelves, parapets, sill pans, and recessed windows.

Features:

- Rubberized asphalt core protects against delamination and tears
- Self-seals around nails and fasteners for lasting watertightness
- Compatible with Moistop Sealant

9"x75'	#9FF	\$50⁷⁷
12"x75'	#12F	\$75⁷²

BETTER

FortiFlash Fusion

FortiFlash® Fusion™ Waterproof Flashing Membrane is our next generation flashing that delivers exceptional quality, performance and value allowing installers to meet tight schedules and even tighter budgets. FortiFlash Fusion features a new butyl based adhesive technology that provides reliability in high temperatures up to 180 °F and protects against moisture intrusion so you can install with confidence even in the most demanding environments.

FortiFlash Fusion Waterproof Flashing Membrane provides a strong, self-sealing barrier that protects windows, doors and through-wall penetrations and is designed to withstand the rigors of the jobsite and the elements.

Features:

- Durable butyl-based core and facer protects against delamination and tears
- Compatible with Moistop® Sealant
- Can be installed at temperatures as low as 30 °F (-1 °C), and as high as 120 °F (-49 °C) so projects stay on track no matter what the condition
- Self-seals around nails and fasteners for lasting watertightness
- AAMA 711 compliant

BEST

FortiFlash Butyl

FortiFlash Butyl provides a strong, tear-resistant, self-sealing barrier to protect windows, doors, and through-wall penetrations from moisture intrusion. It can also be used for non-

roofing horizontal applications such as pot shelves, parapets, still pans, and recessed windows. Made with advanced adhesive, FortiFlash Butyl can be installed in temperatures as low as 25° F and can withstand extreme temperatures up to 250° F. It is compatible with most sealants and the split-back release liner allows for easy integration with weather-resistant barriers.

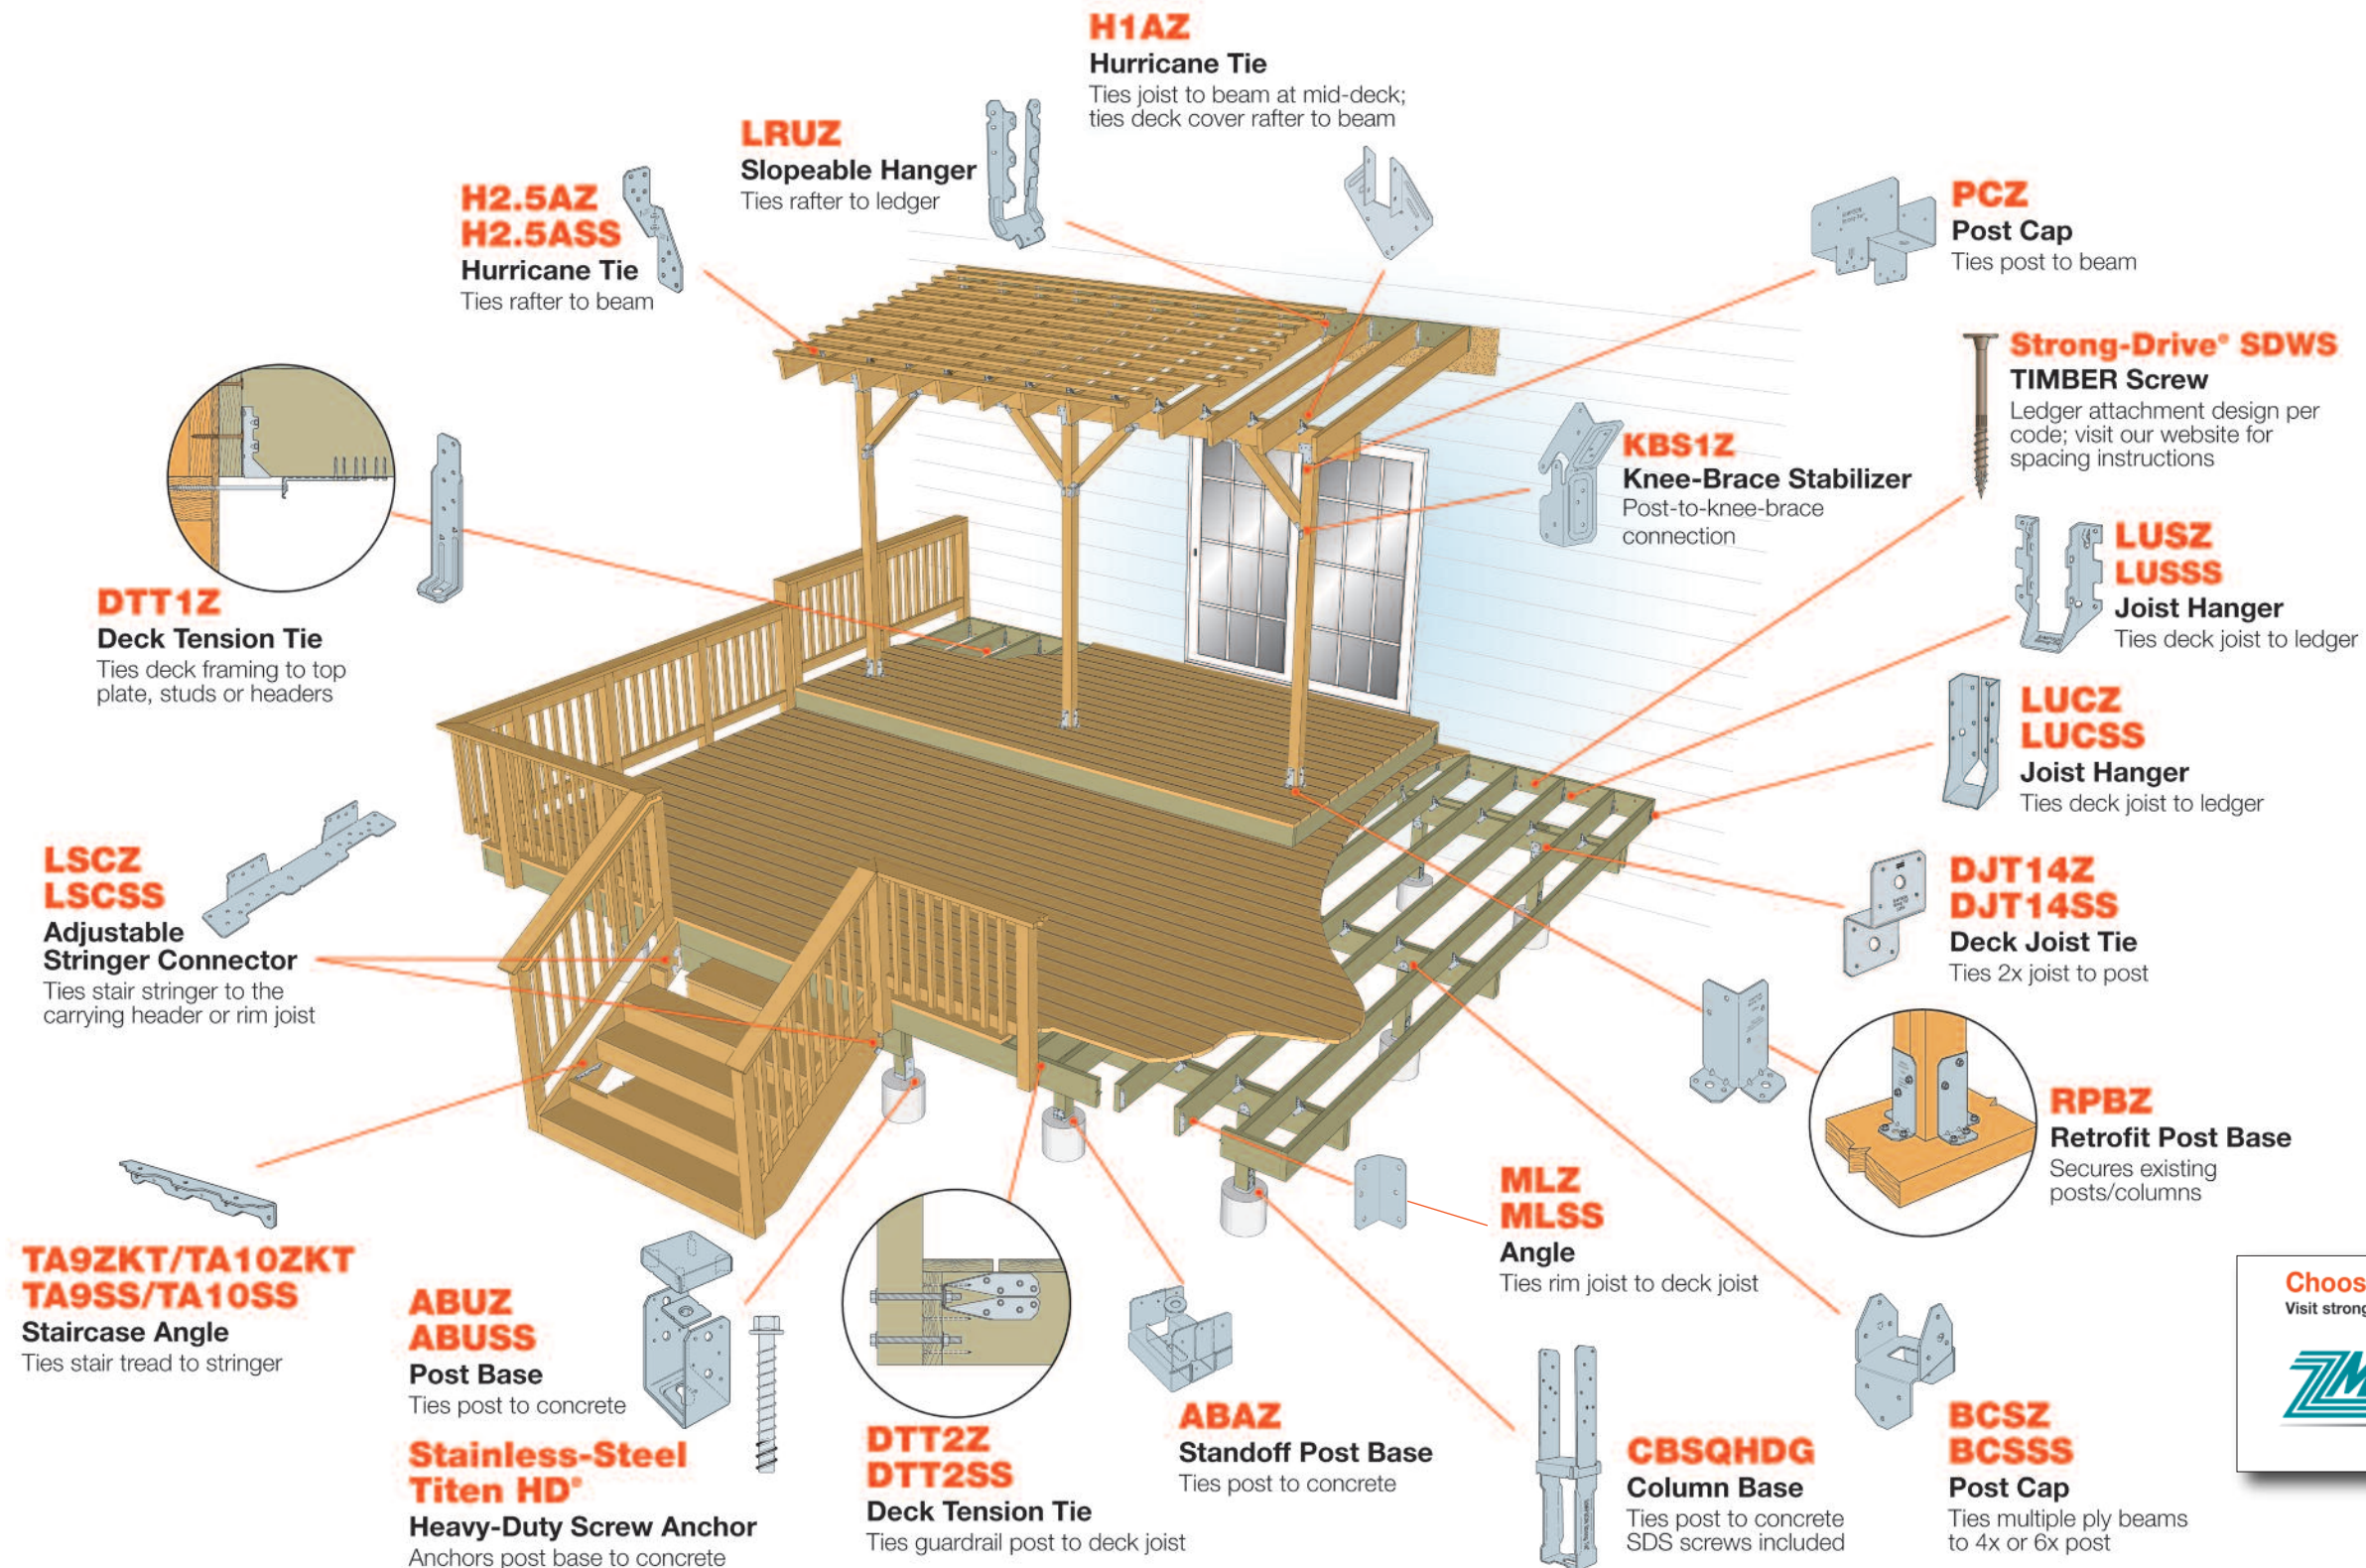

Features:

- Self-seals around nails and fasteners for lasting watertightness
- Can withstand extreme temperatures up to 250° F
- Split-back release for easy handling
- Compatible with Henry's Moistop sealant.

Do your decks meet code?

A complete connector system for building safer, code-compliant decks

Strong-Drive® SD Connector Screws are designed to replace nails in certain products. Visit strongtie.com/ad for complete information.

NOTE: Illustration shows available deck products. Actual products selected will depend upon application or construction method used for a particular deck. Check local building codes before you begin a project. Some sections of deck are removed for product placement view.

Use ZMAX® coated or stainless-steel connectors in outdoor environments and to protect against corrosion from preservative-treated wood. Use ONLY fasteners with a hot-dip galvanized (HDG) or double-barrier coating with ZMAX and post-HDG connectors. Use ONLY stainless-steel fasteners with stainless-steel connectors. Visit strongtie.com/info for critical information.

Choose the Right Level of Corrosion Protection

Makita DIRECT REPAIR

FREE SHIPPING

WE KNOW YOU WORK HARD. MAKITA® FACTORY SERVICE CENTERS ARE HERE TO SERVE YOU.

MAKITA® FACTORY SERVICE CENTERS (FSC) ARE READY TO SERVE WITH NEW DIRECT REPAIR SERVICE. DIRECT REPAIR GIVES USERS FREE "ROUND-TRIP" SHIPPING FOR TOOL REPAIRS TO AND FROM MAKITA® FACTORY SERVICE CENTERS.

MAKITA® IS OFFERING FREE SHIPPING THROUGH THE DIRECT REPAIR ONLINE PROGRAM

HERE'S HOW IT WORKS:

STEP 1 Visit makitatools.com/directrepair

Log in using your Makita® account credentials or register to create a new account.

STEP 2 Complete the form for Makita products only

A pre-paid FedEx shipping label will be sent via email.

Note: Items over 100 lbs. are excluded from pre-paid shipping and will still need to be brought directly to the Makita Factory Service Center. Please call the number above to contact your local Makita Factory Service Center to arrange a large item drop-off

STEP 3 Ship your Makita® Tool at a FedEx shipping location

Place the label on your package and drop-off at a FedEx location for shipping.

STEP 4 Makita® FSC receives and repairs the tool

You pay for the parts and labor.

STEP 5 Makita® FSC returns the tool to you when repairs are completed

Track the process and receive status notifications.

WALK-IN COUNTER REPAIR SERVICES ARE OPEN SUBJECT TO LOCAL AND COMPANY PROTOCOLS

Alternative Service: You can also contact your local Authorized Service Center for repairs. Please contact them directly for available service options and hours of operation.

Open to legal residents in continental United States (excluding residents of Puerto Rico, Hawaii and Alaska).

June is Trex Month

Trex Transcend®
LINEAGE™

\$5⁸⁰ lin.ft. Stock colors Biscayne & Island Mist
Grooved Edge. 1"x5.5" 12', 16', & 20' lengths.
The award-winning next generation of design and performance, featuring heat-mitigating technology for our coolest decking yet. Reflects the sun and your sense of style. Transcend Lineage is engineered to keep your deck cooler, even on the hottest days.

Trex Transcend®

\$5⁴⁵ lin.ft. Stock colors Spiced Rum & Tiki Torch.
Grooved Edge 1"x5.5" 12', 16', & 20' lengths.
Elevated aesthetics paired with the highest level of performance. Transcend decking's deep wood-grain pattern and luxury colors create a premium, ageless look that leave other composites in the dust.

Trex Select®

\$3⁷⁵ 1"x5.5" lin.ft. **\$5⁹⁰** 1.5"x5.5" lin.ft.
Stock colors Saddle & Pebble Grey. 16' & 20' lengths.
The perfect pairing of price and minimal maintenance. Trex Select stands up to both weather and weekend mishaps alike, thanks to its high-performance shell. It resists stains and mold better than traditional composites.

Trex Enhance®

\$2⁸⁰ lin.ft. Stock color Toasted Sand.
Grooved Edge 1"x5.5" 12', 16', & 20' lengths.
Enhance decking offers an authentic wood-grain appearance with the durability of composite and the affordability of wood. Enhance decking boards are scalloped, making them as lightweight as lumber—without the extra work. Long-lasting decking requires little upkeep.

SAVE THE DATE!

Trex & Capital Lumber Reps will be at Mead Clark

SATURDAY June 8th
9am to 1pm

Our Trex experts will be here to show the different types of Trex Decking available and advantages of using Trex for your projects. You can ask questions and get answers. Pick up Free Trex Decking samples too!

We can special order any Trex product or decking color that we do not stock. Call for pricing.

*For every \$100.00 of Trex® products purchased from Mead Clark Lumber in the month of June, you will receive an instant rebate of \$10.00 Valid 6/1/24 thru 6/30/24 only. Not redeemable for cash. No prior purchase adjustments. See store for details.

MAINTENANCE

WARRANTY

INSTALLATION

dassoXTR Fused Bamboo® is manufactured using dasso's patented process, which combines two stages of high heat to first carbonize the bamboo, removing all of the starch and sugar, and then restructure the bamboo, reinforcing its natural strength characteristics. The modified bamboo strands are then fused together using phenolic resin – the same resins used to make bowling balls. The result is an extremely dense, durable exterior-use product composed of 87% natural, fused strand bamboo fibers and 13% resin. dassoXTR Fused Bamboo looks and acts much like other natural hardwood products, specifically Ipe hardwood.

dassoXTR's remarkable durability makes it a unique material for use in outdoor construction materials, including decking, siding, and furniture. In fact, dassoXTR fused bamboo is among the stiffest and strongest decking materials in the world and is even more dense than Ipe – a natural wood that is widely accepted for outdoor use. dassoXTR products are also Class A Fire rated using C NFPA and IBC Classifications tested to ASTM E-84-12 and decay and insect/termite resistant.

dasso.XTR decking receives one coat of WOCA exterior oil at the factory, which gives the boards their color and provides some surface protection. The first coat of WOCA exterior oil typically wears off the board faces during or shortly after the construction phase and when exposed to sun, rain, dirt, and wear.

Evaluate the finish each spring and maintain as needed, following the finish brand's instructions. Finish durability depends upon weather, wear and other local conditions. A penetrating oil finish typically lasts 1–3 years on decks a synthetic surface coating/stain typically lasts 1–2 years on decks.

Redwood

Lumber Grades & Uses

Heartwood - Architectural

Clear All Heart

Finest architectural heartwood grade, normally Certified Kiln Dried (also available unseasoned), well manufactured, free of defects one face (reverse face may have slight imperfections). Available surfaced or saw-textured.

Uses Siding, paneling, trim, cabinetry, molding, fascia, soffits, millwork. Also fine decks, hot tubs, garden structures, industrial storage and processing tanks.

Heart B

Quality heartwood grade containing limited knots and other characteristics not permitted in Clear All Heart and Heart Clear. Available kiln dried or unseasoned. This grade can be surfaced or saw-textured.

Uses Siding, paneling, trim, fascia, molding and other architectural uses. Quality decking, garden shelters and other above-ground outdoor applications.

Heartwood - Garden

Construction Heart/Deck Heart

varying sizes and other slight imperfections. Available seasoned or unseasoned. This highly useful grade can be ordered surfaced or rough. Deck Heart has similar appearance and uses as Construction Heart but is also graded for strength. Deck Heart is available in 2x4 and 2x6 only.

Uses Decks, posts, retaining walls, fences, garden structures, stairs or other outdoor uses especially on or near soil.

Merchantable Heart

This economical heartwood grade allows slightly larger knots than construction grades; holes limited to size of knots. Allows checks, some splits and some manufacturing flaws. Available unseasoned, surfaced or rough.

Uses Fences, retaining walls, garden structures—especially on or near soil.

There are over thirty different grades of redwood lumber including general purpose grades and specialized grades for a single use. There is a grade of redwood for almost any application suitable for wood. Redwood is graded by appearance and durability, with criteria defined by the Redwood Inspection Service.

Excellence of appearance is a major factor in the grading of redwood. Clearness (freedom from knots) is the determinant for the highest grades. Other grades are categorized by number, size and nature of knots and the presence of other characteristics such as stains, crook or manufacturing defects that may occur.

For durability and resistance against insects and decay – redwood is graded by its color. Reddish-brown heartwood from the inner portion of the tree contains extractives that render it resistant to decay.

The cream-colored sapwood that develops in the outer growth layer of the tree does not possess the heartwood's resistance to decay and insects.

As a rule of thumb, all heartwood grades of redwood will have the word "Heart" in the grade name.
