## BUILT ON LEGACY, BORN FOR TOMORROW

### Meet Milgard's new C700 Series Fiberglass.

With a modern profile, expanded color options, and enhanced energy performance, this next-generation fiberglass line delivers strength, style, and reliable operation in every detail.

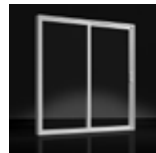

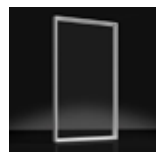

The next chapter in fiberglass performance is here. Built on more than six decades of innovation, **MILGARD C700 Fiberglass Series** windows and doors deliver lasting strength, refined design, and exceptional energy performance — engineered for the homes of tomorrow.

Fiberglass is one of the most durable, energy-efficient materials for windows and doors today. The material's strength supports larger glass panels — ideal for wide-open views and modern designs.

**MILGARD C700** windows and patio doors come with a variety of aesthetic options. They're available in six colors – white, black, bark, bronze, adobe, and steel gray – and the hardware is available in those matching colors in addition to satin nickel and oil-rubbed bronze.

*No prior purchase price adjustments, see store for details.*
