MILGARD®

WINDOWS and DOORS

Introducing Milgard's newest line, the C700 series:

Crafted by years of innovation, **Milgard's C700** line is not only durable, energy efficient, and practical – it's aesthetically pleasing. Featuring simple lines and contemporary designs, the series was crafted to emphasize modernity and style, without compromising on performance!

Strength: Fiberglass is one of the strongest materials on the fenestration market. This sturdy substance can withstand both acts of nature and standard wear-and-tear, making for a long-lasting product.

Energy Performance: Windows made with fiberglass frames offer top-notch energy performance, the C700 is designed to help keep your interior space comfortable, even in the most extreme of climates.

Complementary Products: Between the series' variety of windows and two types of patio doors – swinging and sliding – you can easily furnish your home exclusively with C700 products.

Options for Every Color Palette: Available in white, black, bronze, bark, adobe, and steel gray, ensuring a perfect match for any home.

Milgard® Trinsic™ Series: The Trinsic Series is a contemporary vinyl option with narrow frame profiles and low profile hardware, allowing for the maximum viewable glass area available.

Thermally Approved Aluminum: Popular with architects, aluminum windows and doors help combine durability and the clean lines of modern design. Aluminum frames are available in anodized or baked-on finishes for long lasting color.

Milgard® Tuscany® Series Vinyl: Crafted from a proprietary blend of premium vinyl, which marks the distinction when crafting for superior results. The Tuscany Series windows also come with Milgard's newest features in hardware and security for a lasting impression.

Milgard® Ultra™ Series Fiberglass: Made from glass fibers, the frames of the Ultra Series expand and contract at approximately the same rate as the insulated glass it holds. This puts less stress on the seals, reducing the chance for seal failure while allowing for a clear, fog-free view.

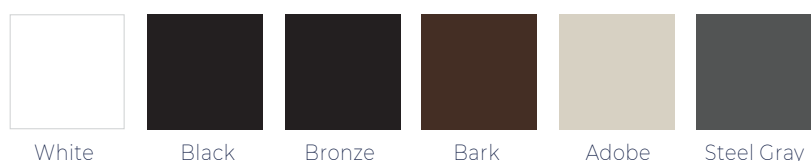

Milgard® Style Line® Series Vinyl: The slim-profile design minimizes the obstructed view between two windows, making the Style Line Series a great choice for a sleek, contemporary look. Frames are available in a multitude of neutral colors to blend with softer tones.

AX550 Moving Glass Walls: An innovative solution that blurs the line between where your indoor space ends, and outdoor living begins. These sliding walls provide an elegant transition for indoor-outdoor living that will help you create the home you've always wanted.
